

## FRAMEWORK FOR PROFILE ENHANCEMENT - KEY COMPONENTS

### 1. Patents - Navigating the Patenting Process

#### - **Research and Preparation**

Before filing a patent, conduct thorough research to ensure your idea is unique and not already patented. This step is crucial in avoiding potential legal issues down the line.

#### - **Choose the Right Type of Patent**

Understanding the different types of patents—utility, design, and plant—is essential. Each serves a specific purpose, so selecting the right one for your invention is key to effective protection.

#### - **File with Confidence**

Once you've prepared your application, file it with the appropriate patent office. This process can be complex, so consider seeking professional assistance to ensure all requirements are met.

### 2. Research Paper

- IJSR
- Global Journals
- IJAR
- IJFMR

### 3. Writing Exercises (Articles/Blogs/Books)

### 4. Social Projects/ Volunteer Work

### 5. Tech Projects

6. Podcasts
7. International & National Competitions
8. Website Development
9. Personality Development Sessions
  - a. Summer Programs
  - b. Mindcraft Series
